RESOURCES

E-Library

Eduera Basis gives your colleagues and students a comprehensive solution of E Library, Personalized software and hardware for the library, there are e-journals, eBooks, video collection, thesis and dissertations, & are provided through a mobile web app solution for accessing the E-Resources.

Health & Medical Collection

Journals	4,500+
Full Text Journals	3,800+
Videos	100+
Full Text Dissertation/Thesis	25000+
eBooks (UG & PG)	20,000+
Other Sources	Available

MEDLINE®

A bibliographic database produced by the U.S. National Library of Medicine (NLM). The database contains millions of citations derived from thousands of biomedical and life science journals and is indexed with Medical Subject Headings (MeSH®) from the NLM controlled vocabulary

Technology Software: Library at your fingertips

Bookmarks for quick access to frequently visited sites.
Browser integration in the mobile app.
Content discovery using library search engines.
Favorite resources for quick reference Directly go to regularly used e-Resources.
Listen and Highlight articles Important notes and Notifications Alerts for library notifications, shared content etc.
Offline reading Save articles for offline reading.
Save and Sync articles Save & Sync articles for later reading.
Single Sign-on and one-time login One-time user login for seamless access

Medisys

For increased convenience we have developed curriculum-based digital educational aids for medical courses. The formats typically combine crisp notes with a wide range of exhibits (illustrations, procedure videos, charts, animations), besides the complete range of audio-visual lectures, question banks, test-prep products,etc. In a self-study context,these modules provideenhanced understanding, practical exposure and practice readiness.

Faculty can utilize different features of the packages to improve teaching/learning efficiencies exhibits and notes set to a curriculum, comprehensive and well-sequenced, a range of exercises and facilitator guidelines, demonstrations and practical guidance – all set to vastly enhance the overall classroom experience. Productivity rises as a consequence.

Our new MBBS package includes the complete range of early clinical exposure (ECE) modules, materials of small-group discussions (SGD) and bedside clinics (BSC), DOAP/labs and practical sessions and essential skill development modules.

LMS is ideal for online teaching, automation of classroom, it also has

1) Digital books
2) AV lectures, dissections, illustration
3) DOAP session
4) Early Clinical Experience
5) Modules of small group discussions & Bed side clinics
6) Certifiable skills modules
7) Question bank, Assessments & performance metrics
